Administrative History

After considering various options for expanding his ranch house in Malibu California which had served as a private museum since 1954, J. Paul Getty decided in the fall of 1968 to build a new museum on the same property, in the form of a first-century Roman country house, based primarily on the plans of the ancient Villa dei Papiri just outside of Herculaneum. The archaeologist Norman Neuerburg, who had studied the ruins of Herculaneum and was an authority on Roman domestic architecture, was retained as a consultant for the project. The Santa Monica firm Langdon & Wilson was hired as architect, and Stephen Garrett, who had served as Getty's consultant in the remodeling of a Getty home in Posillipo, Italy, was retained as overseer of the construction. Landscape architect Emmet Wemple designed the gardens, Garth Benton worked on the murals, and Bruce Ptolomy worked on the fountains. The construction itself was done by Dinwiddie Construction Co., with various subcontractors. Construction began on December 21, 1970, and the new museum opened to the public on January 16, 1974. Despite the enthusiastic public response, mixed critical response questioned the decision to recreate an ancient building.

Upon the death of Mr. Getty and the subsequent establishment of the J. Paul Getty Trust, the Getty Villa became part of a larger vision. The Villa was redesigned by architects Machado and Silvetti Associates and reopened in 2006. While most of the Museum's collections are housed at the Getty Center in Los Angeles, the antiquities collection is still housed at the Villa. The Getty Villa serves a varied audience through the permanent collection, changing exhibitions, conservation, scholarship, research, and public programs in an intimate setting overlooking the Pacific Ocean. Public and scholarly programs at the Villa include lectures, seminars, conferences, workshops, symposia, film series, musical concerts, and theatrical performances in the Barbara and Lawrence Fleischman Outdoor Classical Theater.

Scope and Content of Collection

Records consist of correspondence, memoranda, reports, legal and financial documents, drawings, blueline drawings, minutes, architectural models, photographic images, notes, printed matter, audiocassette tapes, lists, articles, clippings, indexes, contracts, drafts, amendments, permits, deeds, oral histories, and a bond, dating 1960, 1964, 1968-1986, undated (bulk 1971-1974), pertaining to the conceptual development and construction of the J. Paul Getty Museum (Villa). Norris Bramlett, Stephen Garrett, Langdon & Wilson, Norman Neuerburg, are especially prominent in the collection. Much of the correspondence consists of copies of outgoing letters and original incoming letters maintained by either Bramlett or Garrett; discussions concern Villa design, construction, maintenance, landscaping and irrigation, boundaries and easements, security, and various administrative and staff issues. Reports include material produced by Garrett for J. Paul Getty, site studies submitted to Langdon & Wilson, Architects, and "Specifications for Construction of the J. Paul Getty Museum" (and additional bulletins) produced by Langdon & Wilson. Legal documents include permits, permissions, and inspections required

by the City of Los Angeles, a performance bond, guarantees and warranties, and contracts with the consultants and companies. Architects and consultants budgets record the budget estimates, invoices, and expenses of the architects and consultants who worked on the Villa construction project.

Dinwiddie Construction Co. records include minutes and supporting documentation summarize meetings held by Dinwiddie Construction Co. and attended by various contractors and consultants, job diaries filled out by the Dinwiddie site superintendent to document the ongoing construction, schedules, and budget, billing, and payroll files. An incomplete set of blueline prints and architectural drawings were created for the Villa construction project by Langdon & Wilson, the primary architects, and by Stephen Garrett, John S. Gregory Co, Emmet Wemple, Garth Benton, and David Wilkins. The drawings were used to describe, in technical detail, various aspect of the Villa building, from the overall site plan to cross-sectional views and to details of both mosaic floors and plumbing schematics.

Additional records include models representing the Decorative Arts Period Rooms of the Villa museum, photographs documenting the entire construction process, oral histories describing the development of the Villa, and a few printed materials.

[^ Return to Table of Contents](#)

Organization

The collection is organized into ten series:

Series I. Correspondence, 1968-1981;

Series II. Reports, 1968-1974;

Series III. Legal, 1968-1975;

Series IV. Architect and consultant budgets, 1968-1976;

Series V. Dinwiddie Construction Company records, 1970-1975;

Series VI. Blueline prints and architectural drawings, 1964, 1968, 1970-1977, undated;

Series VII. Models, 1972-1973, 1987, undated;

Series VIII. Photographs, 1969-1974, 1976, undated;

Series IX. Oral and written histories, 1972, 1980, 1986;

Series X. Printed matter and notes, 1960, undated.

Administrative Information

Restrictions on Access

The records described in accessions 1986.IA.19, 1986.IA.36, 1987.IA.02, 1987.IA.03, 1987.IA.24, and 2009.IA.28 are available for use by qualified researchers.

The records in accessions 1986.IA.08 and 2013.IA.35, subject to review for permanently closed information, are open to qualified researchers. Requests for access will be reviewed on a case-by-case basis.

The following records are permanently closed: records containing personal information, records that compromise security or operations, legal communications, legal work product, and records related to donors. The J. Paul Getty Trust reserves the right to restrict access to any records held by the Institutional Archives.

Restrictions on Use

Contact [Rights and Reproductions](#) at the Getty Research Institute for copyright information and permission to publish.

Acquisition Information

Assembled from the following acquisitions: 1986.IA.08; 1986.IA.19; 1986.IA.36; 1987.IA.02; 1987.IA.03; 1987.IA.24; 2009.IA.28; and 2013.IA.35.

Processing History

In May 2003, Processing Archivists Phil Curtis and Jesse Rossa produced inventories of the original accessions relating to the J. Paul Getty Museum construction (1986.IA.08; 1986.IA.19; 1986.IA.36; 1987.IA.02; 1987.IA.03; and 1987.IA.24), overseen by Ian Johnston, Assistant Archivist. Phil Curtis produced a series outline and preliminary inventory of the combined collections in June 2003, and subsequently physically reordered the collection and produced the present finding aid, completed in July 2003. Nancy Enneking encoded the finding aid in EAD and completed the processing in the Fall of 2004. Katie Duvall processed accession 2009.IA.28 and added it to the finding aid in 2012. Cyndi Shein added 2013.IA.35 in 2013.

Collection Inventory

Series I. Correspondence, 1968-1981 1.45 Linear Feet (3.5 boxes)

Scope and Contents note:

Records comprise correspondence, memoranda, reports, notes, a few specifications, photographs, and oversize plats, dating from 1968 to 1975, pertaining to the conceptual development and construction of the J. Paul Getty Museum (Villa). Much of the correspondence consists of copies of outgoing letters and original incoming letters maintained by either Norris Bramlett or Stephen Garrett. The majority of the correspondence maintained by Bramlett passed between Getty and members of the Trust/Museum as they discussed the development and construction of the Villa, recording the evolution of planning from a proposed expansion of the existing ranch house museum wing to the construction of the Villa museum. Most of the correspondence maintained by Garrett consists of copies of outgoing letters and original incoming letters Garrett wrote, received, or was copied in on during the course of working for J. Paul Getty and with the staff of the Getty Trust and Museum on the Villa project. The materials contain discussions the Villa design, construction, maintenance, landscaping and irrigation, boundaries and easements, security, and various administrative and staff issues.

Organization:

These records are organized into two subseries:

Series I.A. Chronological correspondence, 1968-1975;

Series I.B. Stephen Garrett correspondence, 1969-1981.

Series I.A. Chronological correspondence, 1968-1975 0.42 Linear Feet (1 box)

Scope and Contents note:

Records comprise correspondence, memoranda, reports, and an oversize plan of Los Liones Canyon, dating from 1968 to 1975, pertaining to the conceptual development and construction of the J. Paul Getty Museum (Villa). Much of the correspondence consists of copies of outgoing letters and original incoming letters maintained by Norris Bramlett. The majority of the correspondence passed between Getty and members of the Trust/Museum as they discussed the development and construction of the Villa. Memoranda were often written to the file to record conversations with and instructions from Getty. The documents record the evolution of planning from discussion of a simple expansion of the existing ranch house museum wing to the construction of what became the Villa museum.

Specific subjects under discussion include the planned design of the Villa and issues such as security and security systems, gallery arrangement and the display of objects, the flow of visitors, environmental controls, potential maintenance issues, decoration, lighting, staff work space, parking, and access to storage areas. The files also include discussions of building orientation, the development and approval of plans and blueprints, land ownership, zoning and permits, landscaping, construction materials, cost estimates, the sale of Getty Oil stock to fund the construction, preparations for the opening, instructions from Getty on the creation of a museum art catalog and, occasionally, instructions from Getty on the purchase of art.

Letters and memos were predominantly written by Norris Bramlett, Stephen Garrett, J. Paul Getty, Burton Fredericksen, Norman Neuerburg, and Langdon & Wilson (architects). On infrequent occasions correspondence is generated by Janet Fox, Carole Tier, Frank Whitworth, and various consultants.

Some files in this subseries are closely related to the next subseries. Each set of files contains unique documents, but some of the correspondence is duplicated. Sometimes an incoming letter or cc. from, for example, Stephen Garrett maintained in this subseries is found as a copy of an outgoing letter in the next subseries, likewise a copy of an outgoing letter to Garrett in

these files seems to have its original in the next subseries. The same is true for some of the correspondence between Garrett and other members of the Trust and Museum as well as with Langdon & Wilson.

Arrangement:

Files are listed in chronological order. The original order of the records, however, appears to have been in reverse chronological order and the documents within the files remain in reverse chronological order.

Series I.B. Stephen Garrett correspondence, 1969-1981 1.03 Linear Feet (2 boxes)

Scope and Contents note:

The records consist of correspondence, memoranda, notes, a few specifications, photographs, and an oversize plat, dating from 1969 to 1981 and maintained by Stephen Garrett, that pertain to the conceptual development and construction of the J. Paul Getty Museum (Villa). Much of the correspondence consists of copies of outgoing letters and original incoming letters Garrett wrote, received, or was copied in on during the course of working for J. Paul Getty and with the staff of the Getty Trust and Museum on the Villa construction project. The majority of the records were created while Garrett was in Getty's employ but still lived and worked in London, prior to his move to Southern California to work for the Museum as Deputy Director in July 1973.

The materials cover various aspects and details of the Villa planning and design, construction, maintenance, landscaping and irrigation, establishment of boundaries and easements, security, and various administrative and staff issues. Some documents are annotated.

Some files in this subseries are closely related to the previous subseries. Each set of files contains unique documents, but some of the correspondence is duplicated. Sometimes an incoming letter from, for example, Norris Bramlett maintained in this subseries is found as a copy of an outgoing letter in the previous subseries, likewise a copy of an outgoing letter to Bramlett, or a member of his staff, in these files seems to have its original in the previous subseries. The same is true for some of the correspondence with other members of the Trust and Museum as well as with Langdon & Wilson. Additionally, two of the files, one concerning Langdon & Wilson and one concerning Norman Neuerburg appear to have been maintained by Norris Bramlett, though Stephen Garrett appears prominently in the documents.

Arrangement:

Records are arranged either by correspondent or by subject matter. Some of the letters that were less well organized were refiled, and in some cases subject file titles were invented to describe folder contents. Within folders, records are in reverse chronological order.

Title/Description	Containers	
Benton, Garth, 1971-1973	Box 1986.IA.08-02	Folder 1

[^ Return to Table of Contents](#)

Series II. Reports, 1968-1974 2.1 Linear Feet (5 boxes)

Scope and Contents note:

The series includes reports, correspondence, memoranda, lists, articles, clippings, notes, and an index, dating 1968-1974, produced by the consultants, architects, and artisans who worked on the construction of the J. Paul Getty Museum (Villa). Site studies were submitted to Langdon & Wilson, Architects, regarding J. Paul Getty Museum (Villa) foundations and geologic conditions. Stephen Garret's reports include copies of 60 numbered reports created by him for J. Paul Getty. The reports detail specifics of the Villa planning and construction process which Getty, who was living in England at the time, either needed to be informed of or needed to make a decision about. Langdon & Wilson produced "Specifications for Construction of the J. Paul Getty Museum" in December 1970, and produced thereafter a series of Bulletins as amendments or supplements to the original document. Norman Neuerburg, Langdon & Wilson, and various contractors are represented in a few miscellaneous reports.

Organization:

These records are organized into three subseries:

Series II.A. Site studies, 1970, 1972-1974;

Series II.B. Reports from Stephen Garrett, 1968-1973;

Series II.C. Reports from architects and consultants, 1970-1974.

Series II.A. Site studies, 1970, 1972-1974 0.17 Linear Feet

Scope and Contents note:

Records comprise reports and correspondence, dating 1970, 1972-1974, submitted to Langdon & Wilson, Architects, regarding J. Paul Getty Museum (Villa) foundations and geologic conditions. The foundation inspections were prepared by LeRoy Crandall and Associates in collaboration with Edward G. Genter, Jr. and Brandow & Johnston Associates, Structural Engineers. The geologic investigations were performed by Glenn A. Brown and Associates.

Arrangement:

The Crandall reports precede the Brown reports.

[Plastic spiral binders and covers have been removed - box contents are a little loose now - may need a spacer; the Geologic Investigation reports are on poor quality paper and should be photocopied]

Title/Description	Containers
Report of Foundation Investigation, Proposed Gate Entrance Structure, 1972-1973 [2 copies]	Box 1986.IA.08-04 Folder 1

Geologic Investigation, Entry and Guard House, 1973 [2 copies]	Box 1986.IA.08-04 Folder 4

Series II.B. Reports from Stephen Garrett, 1968-1973 1.25 Linear Feet (3 boxes)

Scope and Contents note:

Records include reports, correspondence, memoranda, lists, notes, and an index, dating 1968-1973, maintained in the offices of Norris Bramlett. Stephen Garret prepared 60 numbered reports for J. Paul Getty detailing specifics of the Villa planning and construction process which Getty, who was living in England at the time, either needed to be informed of or needed to make a decision about. Copies of these reports were sent to the Getty Trust in Los Angeles. The reports are often structured in sections describing the work that had been accomplished, offering recommendations, and proposing questions to be answered by Getty. A number of the reports simply summarize discussions held with and decisions made by Getty. Some reports are accounts of meetings with people involved in the Villa project, others seem to include subjects and points of interest which Garrett felt were of interest to Getty, such as a translation of a 19th century text about the Villa dei Papiri. In between the numbered reports, there are shorter memos, correspondence, and notes, typically summarizing discussions and decisions reached in meetings held to review issues raised in the reports.

Arrangement:

The records are arranged chronologically. At least two copies of most reports have been preserved.

Series II.C. Reports from architects and consultants, 1970-1974 0.63

Linear Feet (2 boxes)

Scope and Contents note:

The records consist of reports, with some accompanying memoranda, correspondence, articles, clippings, and notes, dating 1970-1974, that were created by Langdon & Wilson and various contractors to record the progress of the construction of the Villa Museum. The reports were sent to Getty, Norris Bramlett, and Stephen Garrett. Some of the reports record the construction status and responses to specific construction questions.

The majority of the reports were written by Langdon & Wilson, who produced the "Specifications for Construction of the J. Paul Getty Museum" in December 1970 and followed up with a series of Bulletins that served as amendments or supplements to the original document. The first report details the original construction specifications while the Bulletins describe later revisions and additions.

Arrangement:

These are arranged chronologically. Two copies of the majority of the Bulletins have been preserved.

Series III. Legal documents, 1968-1975 0.25 Linear Feet (1 box)

Scope and Contents note:

Records comprise contracts, correspondence, drafts, amendments, notes, memoranda, permits, deeds, oversize plans, and a bond, dating 1968-1975, relating to the construction of the J. Paul Getty Museum (Villa). The materials document various permits, permissions, and inspections required by the City of Los Angeles, performance bond taken out with Seaboard Surety Company, lists of materials guarantees and warranties, and contracts with the consultants and companies. The bulk of the materials are photocopies.

Arrangement:

Agreements and contracts are followed by permits and permissions.

Series IV. Architect and consultant budgets, 1968-1976 0.41 Linear Feet (1 box)

Scope and Contents note:

Documents include correspondence, budget estimates, invoices, expense summaries, and memoranda, dating 1968-1975, that record the budget estimates, invoices and expenses of the architects, consultants and vendors who worked on the J. Paul Getty Museum (Villa) construction project. Individuals and firms that figure prominently include Stephen Garrett, Norman Neuerburg, Langdon & Wilson, Garth Benton, and Emmet Wemple. Files dealing with the Decorative Arts galleries originated from the office of Gillian Wilson, the Curator of Decorative Arts.

Arrangement:

Stephen Garret's and Norman Neuerburg's files appear first, followed by Langdon & Wilson estimates and invoices, mural and landscaping estimates, Decorative Arts gallery files, and an estimated Villa budget.

[^ Return to Table of Contents](#)

Series V. Dinwiddie Construction Company records, 1970-1975 6.9 Linear Feet (18.5 boxes)

Scope and Contents note:

Records consist of minutes, memoranda, notes, job diaries, drafts, schedules, financial documents, budgets, billing statements, certificates of payment, receipts, invoices, correspondence, graphical charts, and estimates, dating 1970-1975, that track the

involvement of and work performed by the Dinwiddie Construction Co. on the J. Paul Getty Museum (Villa) construction project.

The minutes and supporting documentation summarize meetings held by Dinwiddie Construction Co. and attended by various contractors and consultants to discuss the progress and status of various aspects of the Villa construction project. The job diaries are forms filled out and signed by the Dinwiddie site superintendent on a daily basis to document the ongoing construction activities and the number of workmen employed at the Villa site. The schedules record the anticipated (and revised) plans for construction of the Villa and installation of various building components. The budget and billing files were submitted by Dinwiddie to estimate and document construction and payroll costs incurred while working on the Villa.

Organization:

These records are organized into three subseries:

Series V.A. Minutes and meeting supporting documentation, 1971-1973;

Series V.B. Schedules and diaries, 1970-1974;

Series V.C. Billings and expenditures, 1970-1975.

Series V.A. Minutes and meeting supporting documentation, 1971-1973

0.3 Linear Feet (1 box)

Scope and Contents note:

Records consist of minutes, memoranda, notes, drafts, and schedules, dating 1971-1973, that summarize meetings held by Dinwiddie Construction Co. and attended by various contractors and consultants to discuss the progress and status of various aspects of the J. Paul Getty Museum (Villa) construction project. The meeting attendees often, but not always, include representatives from the Getty Museum (Stephen Garrett, Norris Bramlett, Burton Fredericksen, and Gillian Wilson). Accompanying some of the minutes are brief "State of the Job" reports, listing the status of all parts of the construction, as of the date of the document, for the purpose of determining areas that may need special attention from the contractors, designers, and/or the owner to ensure that the completion dates are met. Very rarely, revised construction schedules are attached to the minutes. Some minutes are annotated. Interspersed with the job meeting minutes are minutes from smaller meetings held to discuss marble installation and the finishing schedule.

Subjects of the meetings include numerous issues with the mechanical aspects of the Villa (transformer vaults, sewer plans, etc.), the scheduling of various construction activities (such as pouring concrete and painting), lighting decisions, reviewing samples of building materials, road improvements, bids, permits, variances, fire suppression, and other construction details.

Arrangement:

The meeting minutes are listed in numerical and chronological order. A separate file of "State of the Job" reports appears at the end.

Series V.C. Budgets and billings, 1970-1975 6.25 Linear Feet (15 boxes)

Scope and Contents note:

Financial documents, budgets, billing statements, certificates of payment, receipts, correspondence, memoranda, graphical charts, and estimates, dating 1970-1975, comprise the budget and billing files submitted by Dinwiddie Construction Company to estimate and document construction and payroll costs incurred while working on the J. Paul Getty Museum (Villa). The majority of the records are made up of formerly bound groupings of Dinwiddie subcontractor billing and payroll documents.

Arrangement:

Estimates, expenditures, billing totals, and summary sheets are followed by billing and payroll documents.

[^ Return to Table of Contents](#)

Series VI. Blueline prints and architectural drawings, 1964, 1968, 1970-1977, undated 22.4 Linear Feet (1 box, 6 flat file drawers, 2 oversize boxes)

Scope and Contents note:

Records consist of blueline drawings, color pencil, ink, and watercolor drawings, memoranda, photographs, negatives, transparencies, and an index, dating 1964, 1968, 1970-1977, and undated, created for the J. Paul Getty Museum (Villa) construction project by Langdon & Wilson, the primary architects, and by Stephen Garrett, John S. Gregory Co, Emmet Wemple, Garth Benton, and David Wilkins. The drawings were used to describe, in technical detail, various aspect of the Villa building, from the overall site plan to cross-sectional views and to details of both mosaic floors and plumbing schematics. The dates listed for the drawings reflect the earliest date on each drawing, though some drawings do contain later additions and revisions. The Langdon & Wilson materials include an index of the blueline drawings prepared by the architects. Comparing the blueline drawings listed below with the drawings listed in the index, it does not appear that the existing drawings are a complete set of building plans.

The color drawings provide representational views of the intended completed Villa building. The photographic media frequently contain images of both the color drawings and the blueline drawings

Arrangement:

Materials produced by Langdon & Wilson precede those produced by other sources. In each case, the blueline drawings are followed by drawings and photographs of the blueline drawings. The Langdon & Wilson blueline drawings are listed in the order which they appear in the index found in the first folder.

Series VIII. Photographs of museum and museum construction, 1969-1974, 1976, undated 5 Linear Feet (1 flat file folder, 3 photo albums, 3 oversize boxes, 1 box)

Scope and Contents note:

The records consist of photographs of the J. Paul Getty Museum (Villa) site, photos of the museum construction, and photos taken shortly after the museum's completion, dating 1969-1974, 1976, undated (bulk 1971-1974). The site photos are oversize aerial photos of the Villa site, taken before the beginning of construction, in 1968 and 1969. The majority of the photographic prints are either in three albums (ca. 800-1200 photos) or are loose. The photos in the albums are frequently dated and captioned on the back. A number of copies of photos from the albums have been pasted together to form panoramas, and were assembled by Stephen Garrett to show J. Paul Getty the progress of the construction project. These "paste-ups" are on cardboard backing with captions.

Arrangement:

Aerial site photos precede photos of construction progress and completed museum. The construction progress albums precede the "paste-ups". The photos in the albums have been assembled chronologically, the "paste-ups" are in numerical order. Several images of the completed museum are listed at the end.

[^ Return to Table of Contents](#)

Series IX. Oral and written histories of the J. Paul Getty Museum (Villa) design and construction, 1972, 1980, 1986 0.1 Linear Feet (3 audiocassettes and 2 folders)

Scope and Contents note:

The records consist of audiocassettes, notes, and printed material, dated 1972, 1980, and 1986, that include two recordings of lecture/conversations about the J. Paul Getty Museum (Villa) building project, one by Stephen Garrett, and the other (with typed transcript) by Norman Neuerburg. In addition, there are a few pages of a book proposal by Neuerburg with some introductory pages giving autobiographical material and background on the project.

Arrangement:

The audiocassettes precede the transcripts and book pages.

Title/Description	Containers	
Cassette audiotape of Stephen Garrett talking about slides of the construction of the Getty Museum, recorded Fall 1980	Box 1987.IA.24-4	
Cassette audiotapes: "Norman Neuerburg on the Design of the Getty Museum," conversation during walking tour Neuerburg 1986 [2 tapes]	Box 1987.IA.03-1	
Typed transcripts of Norman Neuerburg on the Design of the Getty Museum" walking tour: one 46 page draft with handwritten corrections and one 45 page final copy, 1986	Box 1987.IA.03-1	
Norman Neuerburg manuscript: draft of a "Monograph on the Architecture of the J. Paul Getty Museum," May 29, 1972	Box 1986.IA.08-29	Folder 6

General note:

[Includes an outline of the proposed book, as well as ca. 2 pages of the manuscript, which includes autobiographical material. Appendices are: "Proposal for Garden Display Room," credited to Neuerburg, Emmet Wemple and Denis Kurutz; "Thoughts On Museum Installation: memorandum" by Neuerburg; and "Villa Display Room: proposal" by Neuerburg.]

[^ Return to Table of Contents](#)

Series X. Printed matter and notes, 1960, undated 0.1 Linear Feet (1 box)

Scope and Contents note:

Records consist of notes and printed materials, dating from 1960 and undated, related to research and planning for the J. Paul Getty Museum (Villa). Museum staff member Gillian Wilson seems to have been the creator of the majority of the notes, while the printed materials was created by the Guggenheim Museum and presumably was retained to serves as samples of the types of ephemeral introductory material produced by other museums.

Arrangement:

The printed materials precede the notes.

Title/Description	Containers
